From Inside:

Tracing the History of Contemporary Taiwan's Aboriginal Groups Su-Chiu Kuo,2022-09-28 Using archaeological evidence the author investigates the prehistories of Austronesian migrants to Taiwan and their connections to contemporary peoples in Taiwan Due to its unique geographic location Taiwan has played a significant role in various peoples maritime migrations and the process of cultural interactions for tens of thousands of years Within the history of humankind Taiwan has also evidenced a high degree of cultural continuity Paleolithic people had already settled on the island at least 30 000 years ago but Taiwan only entered the historical period as recently as the 17th century Before this there was a long and continuous development over the prehistoric period To this day there are at least 20 different indigenous ethnic groups on the island totalling over half a million people all of whom speak Austronesian languages Investigating the archaeology of abandoned villages Kuo takes the Paiwan and Sanhe cultures as key case studies of these groups This book provides valuable insight for historians and archaeologists of Taiwan and scholars of prehistoric Austronesian migration *Bulletin Iowa Engineering Experiment Station,1918* **Extimate Technology** Ciano Aydin,2021-01-21 This book investigates how we should form ourselves in a world saturated with technologies that are profoundly intruding in the very fabric of our selfhood New and emerging technologies such as smart technological environments imaging technologies and smart drugs are increasingly shaping who and what we are and influencing who we ought to be How should we adequately understand evaluate and appreciate this development Tackling this question requires going beyond the persistent and stubborn inside outside dualism and recognizing that what we consider our inside self is to a great extent shaped by our outside world Inspired by various philosophers especially Nietzsche Peirce and Lacan this book shows how the values goals and ideals that humans encounter in their environments not only shape their identities but also enable them to critically relate to their present state The author argues against understanding technological self formation in terms of making ourselves better stronger and smarter Rather we should conceive it in terms of technological sublimation which redefines the very notion of human enhancement In this respect the author introduces an alternative more suitable theory namely Technological Sublimation Theory TST Extimate Technology will be of interest to scholars and advanced students working in philosophy of technology philosophy of the self phenomenology pragmatism and history of philosophy The Open Access version of this book available at <http://www.taylorfrancis.com/books/9781003139409> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license University of Iowa Studies in Engineering. ...
