## **Einstein His Life Times:**

Einstein Walter Isaacson, 2008-09-04 NOW A MAJOR SERIES GENIUS ON NATIONAL GEOGRAPHIC PRODUCED BY RON HOWARD AND STARRING GEOFFREY RUSH Einstein is the great icon of our age the kindly refugee from oppression whose wild halo of hair twinkling eyes engaging humanity and extraordinary brilliance made his face a symbol and his name a synonym for genius He was a rebel and nonconformist from boyhood days His character creativity and imagination were related and they drove both his life and his science In this marvellously clear and accessible narrative Walter Isaacson explains how his mind worked and the mysteries of the universe that he discovered Einstein s success came from questioning conventional wisdom and marvelling at mysteries that struck others as mundane This led him to embrace a worldview based on respect for free spirits and free individuals All of which helped make Einstein into a rebel but with a reverence for the harmony of nature one with just the right blend of imagination and wisdom to transform our understanding of the universe This new biography the first since all of Einstein s papers have become available is the fullest picture yet of one of the key figures of the twentieth century This is the first full biography of Albert Einstein since all of his papers have become available a fully realised portrait of this extraordinary human being and great genius Praise for EINSTEIN by Walter Isaacson YOU REALLY MUST READ THIS Sunday Times As pithy as Einstein himself New Scientist A brilliant biography rich with newly available archival material Literary Review Beautifully written it renders the physics understandable Sunday Telegraph Isaacson is excellent at explaining the science Daily Express Einstein Philipp Frank, 1947 **Laser Physics and Spectroscopy** Pradip Narayan Ghosh, 2018-02-19 In this book emphasis is laid on laser including its operation different types properties like coherence and monochromaticity beam propagation theoretical treatment of atom field interaction semi classical laser theory non linear effects quantum properties photon concept and coherent states etc Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *Before Big Science* Mary Jo Nye, 1999 Notable features of the book include an insightful analysis of the parallel trajectories of modern chemistry and physics and the work of scientists such as John Dalton Michael Faraday Hermann von Helmholtz Marie Curie Ernest Rutherford Dorothy Hodgkin and Linus Pauling who played prominent roles in the development of both disciplines

**Atomic Structure and Lifetimes** Lorenzo J. Curtis, 2003-10-30 This book presents a new approach to introductory graduate courses on atomic structure The author s approach utilizes conceptually powerful semiclassical modeling methods and demonstrates the degree to which the Maslov indexed EBK quantization elucidates the quantum mechanical formulation of level energies and lifetimes It merges this with an update and extension of semiempirical data systematizations developed by Bengt Edl n to describe complex atoms and adapts them to include the specification of lifetimes The text emphasizes the historical basis of the nomenclature and methodologies of spectroscopy However interaction mechanisms are presented deductively based on quantum mechanical and field theoretical models rather than tracing their indirect paths of discovery

Many worked examples provide applications to areas such as astrophysics hyperfine structure and coherent anisotropic excitation The book presents a firm foundation for specialists in atomic physics as well as a capstone application for specialists in astrophysics chemistry condensed matter and other related fields [The New York Times Index](#) ,1923
