Evaluating Health Projects Susan Stout, 1997-01-01 This book explores the wave of decentralization that has swept through Latin America and the projected institutional changes within the governments in the region Although it notes the ways in which decentralization implies a critique of past governing patterns the emphasis is on such potential consequences of governmental change as the strengthening of democratic participation in government and the improvement of local public service The book draws upon institutional experiments carried out at the state level to examine which decentralization strategies work best in Latin America It is organized around three major requirements for the success of decentralization Establishing the national fiscal framework Moving government closer to the people Improving municipal service delivery Tables illustrate the shift of revenues and expenditures from central authorities to intermediate levels of government

A Review of the HHS Family Planning Program

Institute of Medicine, Board on Children, Youth, and Families, Board on Health Sciences Policy, Committee on a Comprehensive Review of the HHS Office of Family Planning Title X Program, 2009-08-07 A Review of the HHS Family Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970. The program successfully provides family planning services to its target audience of low income individuals but there is room for improvement. While the program's core goals are apparent a secondary set of changing priorities has emerged without a clear evidence based strategic process. Also funding for the program has increased in actual dollars but has not kept pace with inflation or increased costs. Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population. At the same time the extent to which the program meets those needs cannot be assessed without a greater capacity for long term data collection. A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program as well as to demonstrate its direct contribution to important end results such as reducing rates of unintended pregnancy, cervical cancer and infertility. The book will guide the Office of Family Planning toward improving the effectiveness of the program. Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning, policy makers, researchers and professional organizations.
