Catalogue of the books, manuscripts, maps and drawings in the British museum, natural history British museum nat. hist. mus,1903 **Ancient Perspectives** Richard J. A. Talbert,2014-02-14 Contains must read essays for all those interested in the history of these earliest forms of cartography A truly wonderful read John Hessler Library of Congress The Portolan Ancient Perspectives encompasses a vast arc of space and time Western Asia to North Africa and Europe from the third millennium BCE to the fifth century CE to explore mapmaking and worldviews in the ancient civilizations of Mesopotamia Egypt Greece and Rome In each society maps served as critical economic political and personal tools but there was little consistency in how and why they were made Much like today maps in antiquity meant very different things to different people Ancient Perspectives presents an ambitious fresh overview of cartography and its uses The seven chapters range from broad based analyses of mapping in Mesopotamia and Egypt to a close focus on Ptolemy s ideas for drawing a world map based on the theories of his Greek predecessors at Alexandria The remarkable accuracy of Mesopotamian city plans is revealed as is the creation of maps by Romans to support the proud claim that their emperor s rule was global in its reach By probing the instruments and techniques of both Greek and Roman surveyors one chapter seeks to uncover how their extraordinary planning of roads aqueducts and tunnels was achieved Even though none of these civilizations devised the means to measure time or distance with precision they still conceptualized their surroundings natural and man made near and far and felt the urge to record them by inventive means that this absorbing volume reinterprets and compares
