## **Effective Educational Leadership:**

**Effective Educational Leadership** Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25 Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate. Tim Brighouse's *Times Educational Supplement* article's unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s. Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs. I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership. Its greatest contribution is its exploration of the links between effective leadership and effective education. The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades. There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration. *Journal of Educational Administration* Leadership is the theme of this decade. This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform. A great and timely collection. Michael Fullan, Dean OISE, University of Toronto. This book makes an excellent contribution to the current debate on Educational Leadership. It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels. Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality. The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader and to the professional provider of CPD in leadership offering a wealth of information that can be practically adopted and adapted for a range of courses. Stephen Merrill, *Journal of Inservice Education*. Educational management and administration studies focus on leadership as a key determinant of effective educational institutions and currently much leadership preparation is characterized by a rational skills focused approach. Placing current thinking in leadership studies in its organizational and historical context, this book explores its implications for leadership preparation, leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice. It draws on literature and research from both the private and public sectors. It is deliberately international in its content and focus and examines a range of practice both within and outside education. Each chapter has a short introduction by the editors setting it in context. This book is for providers and students in higher educational institutions for postgraduate level courses in educational management and for leadership development provision for Headteachers induction programmes NPQH and LPSH. It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools, colleges and other educational organizations. [Effective School Leadership: a Framework for School Leaders](#) Ada G. Omile, 2016-07-14. The effectiveness of school principals is a hot topic in these days of

increased accountability for student performance but unfortunately there hasn't been a detailed framework available to help support and improve school leadership until now. In *Effective School Leadership: A Framework for School Leaders*, author and educator Dr. Ada G. Omile addresses the problem of professional training by offering a detailed look at various operational strategies and best management practices. Based on hands-on research and practical experience, this unique book outlines specific ways that educational leaders can improve their success. By looking collectively at variables such as leadership, instructional practice, system-wide improvement plans, collaborative relationships, and strong community partnerships, this easy-to-use guide provides a comprehensive structure for supporting and enhancing an institution's improvement planning process. With these factors in harmony, educators stand a much better chance of making a real difference in terms of student achievement and reversing the often fruitless revolving cycle of reform and implementation. In the vein of Jim Kouzes and Barry Posner, this remarkable resource is designed specifically for administrators but is beneficial for anyone in a leadership position.

**Effective Leaders for Today's Schools**, 1999 [The Effective School Leader's Guide to Management](#) Jane L. Sigford, 2005-10-07. Discover how to be a successful school leader and manager. Organized into three sections: management and leadership theories, managing the school, and managing yourself, this resource helps administrators understand the complexity of leadership and addresses the application of effective management skills to create successful learning communities. Written for new and veteran school leaders, this essential guide acts as a handbook which contains an overview of individual components of school leadership normally scattered among many textbooks and resources. Suggests questions to help facilitate professional development group discussions, especially among peers.

**Effective Educational Leadership. Leading and Managing for Effective Education** Nigel Bennett, Megan Crawford, Marion Cartwright, 2002.
