Self-Esteem Therapy R. A. Steffenhagen, 1990-10-19 In this volume Steffenhagen offers a practical guide to self esteem therapy As the author explains at the outset self esteem therapy is a uniquely effective therapy which stems from the seminal work of Alfred Adler and incorporates Husserl s phenomenology George Simmel s social conflict theory and the dialectic of Karl Marx It can be used to combat problems resistant to other therapies such as persistent drug abuse In fact notes Steffenhagen the therapy is effective even if the patient s problem cannot be readily identified by building an individual s self esteem the problem itself can be eliminated without ever being directly addressed Psychologists and counselors who wish to incorporate self esteem therapy into their own treatment regimens will find Steffenhagen s work an indispensable reference source The first two chapters provide the concepts necessary to understand both the foundation of self esteem therapy and its application in the therapeutic setting Chapter 3 surveys current psychotherapies and demonstrates that self esteem therapy provides a simpler more usable conceptual framework for effective treatment Steffenhagen also demonstrates that any therapy which is successful helps the client build self esteem regardless of the complexity of its conceptual development A separate chapter provides a detailed discussion of the theory underlying self esteem therapy while the final chapter presents a number of therapeutic modalities which can be used to build self esteem Several appendixes and a bibliography provide additional information for the reader who wishes to pursue further studies in this area *Handbook of Innovative*
