Bonner Denton, 2000 The number of researchers using imaging devices in their work continues to increase rapidly Disciplines including astronomy biology chemistry physics and manufacturers of imaging devices optical components and complete optical systems are recognising the enormous potential Further Developments in Scientific Optical Imaging brings together the latest information on commercial and academic research development and applications in scientific optical imaging from state of the art devices to exciting explorations in space Topics range from a new generation of CCDs through spectroscopic applications of CTDs to improved image processing and new applications for microscopy and spectroscopy Experts from around the world provide overviews of important aspects of optical imaging such as design considerations device fabrication and integration and data reduction Comprehensive and international in coverage this book will be welcomed by developers manufacturers and users of this technology in universities observatories and businesses around the world Scientific Detectors for Astronomy 2005 Jenna E. Beletic, James W. Beletic, Paola Amico, 2006-09-14 The 2005 meeting in Taormina Italy was attended by 127 professionals who develop and use the highest quality detectors for wavelengths from x ray to sub mm with emphasis on optical and infrared detectors The meeting consisted of overview talks technical presentations poster sessions and roundtable discussions These proceedings capture the technical content and the spirit of the 2005 workshop The 87 papers cover a wide range of detector technologies including CCDs CMOS APDs and sub mm detectors There are papers on observatory status and plans special applications detector testing and characterization and electronics A special feature of these proceedings is the inclusion of pedagogical overview papers which were written by teams of leading experts from different institutions These proceedings are appropriate for a range of expertise levels from undergraduates to professionals working in the field The information presented in this book will serve as a valuable reference for many years to come This workshop was organized by the Scientific Workshop Factory Inc and the INAF Osservatorio Astrofisico di Catania Scientific Detectors for Astronomy P. Amico, James W. Beletic, 2006-04-18 Dear Friends It seems like it was only yesterday that we drove the last of you to the airport The memories and the spirit of the Scientific Detectors for Astronomy Workshop SDW2002 remain fresh and strong For us this was a very special event a great gathering of what may be one of the friendliest and most cooperative technical communities on our little planet We have tried to capture the spirit of the Workshop in these Proceedings and we hope you are able to relive your week in Hawaii For those readers who did not attend we invite you into this community As you probably noticed there is a new name on the cover Jenna Beletic was the ace up our sleeve for these Proceedings As a summer intern at Keck she took up the task of organizing proofreading editing and formatting the papers She also made the graphics her artistic talents shine on pages xxxiii and xxxv contacted authors and prepared the mountain of paperwork which goes with producing a book Jenna s enthusiasm at learning her passion for the job and creativity e g find 100 ways to get
