Bombs, Cities, and Civilians Conrad C. Crane,1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In *Bombs Cities and Civilians* Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties

Business Week ,2001 *The Strategic Bombing of Germany, 1940-1945* Alan Levine,1992-07-22 This book is the only full scale account of the strategic air offensive against Germany published in the last twenty years and is the only one that treats the British and the Americans with parity Much of what Levine writes about British operations will be unfamiliar to American readers He has stressed the importance of winning air superiority and the role of escort fighters in strategic bombing and has given more attention to the German side than most writers on air warfare have Levine gets past a simple account of what we did to them and describes the target systems and German countermeasures in detail providing exact yet dramatic accounts of the great bomber operations the Ruhr dams Ploesti and Regensburg and Schweinfurt The book is broad guaged touching many matters from the development of bombing doctrine before the war to the technical development of the Luftwaffe and the RAF jets and V weapons to the role of the heavy bombers in supporting land and sea operations Levine stresses the impact of bombing on the war and generally endorses the strategic air campaign as worthwhile and effective But he concludes that many mistakes were made by the Allies both the British and the Americans in tactics the development of equipment and in the selection of targets Levine sees strategic bombing as a powerful tool that was often misused particularly when the doctrine of area bombing flourished
