### Scientific Inquiry Cycle: Review

Science helps communities solve problems by developing knowledge and creating things that "solve" real-world issues such as water quality or waste management using scientific methods or improve solutions that have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Sometimes, important parts of a solution might be challenging, so it's important to weigh their trade-offs carefully. For example, creating materials for a house that are affordable to build and easy to use, cannot influence the effectiveness of the solution.

After identifying a solution, determining how it works, what constraints affected it, and any compromises that have already been or should be made on the way. Communication, using digital media, and reflecting on the results of the solution are important steps. The process of sharing findings locally encourages responsible decision-making and helps communities thrive.

#### 6A. Mark the best answer for each question.

1. What is the first important step when working on how to solve a local problem?
- a. Thinking of a solution immediately

2. What does determining constraints in a solution help with?
- a. Finding the constraints of the solution
  - b. Evaluating the solution for safety and safety
  - c. Breaking the task into smaller parts
  - d. Determining what the solution has to solve
3. Which is an example of a trade-off?
- a. Finding a solution with no constraints
  - b. Finding a solution with no trade-offs
  - c. Finding a solution with no trade-offs
  - d. Finding a solution with no trade-offs
4. Why is it important to consider constraints when designing a solution?
- a. To avoid run-time errors
  - b. To make the solution work
  - c. To avoid the problem from occurring
  - d. To avoid designing a solution

#### 6B. Mark if the statement is True (T) or False (F).
