Educationally Speaking:

Hearings, Reports and Prints of the House Committee on Education and Labor United States. Congress. House. Committee on Education and Labor, 1968 Making Sense of Education Gert Biesta, 2012-06-05 This volume gives educational theorists the chance to let rip and say what they really want to say In doing so it sends a blast of fresh air through the dusty halls of academe The vast majority of the literature in education theory and philosophy follows the conventions of academic writing and rightly so Yet its formal abstract and objective style which focuses on the careful presentation of theoretical and philosophical arguments doesn't always give us insights into what motivates and drives the authors while for academic neophytes it can be dense and arcane Here those same theorists and philosophers have been given the chance to expound at length on the topics that most exercise them What concerns them what gets them up in the morning and what really matters most to them Readers will discover what happens when these thinkers are explicitly invited to go beyond academic conventions and experiment with form style and content Featuring collected essays from leading educationalists from Norway Sweden Denmark the USA Canada Israel Germany Belgium and the UK these essays provide vital insights into their work as well as being a compelling introduction to contemporary attempts to make sense of education through theory and philosophy All these authors have made key contributions to the field and their unique manifestos make a fascinating read for any student or practitioner in education **Reimagining Science Education in the Anthropocene, Volume 2** Sara Tolbert, Maria F.G. Wallace, Marc Higgins, Jesse Bazzul, 2023-11-29 This volume a follow up to Reimagining Science Education in the Anthropocene 2021 continues a transdisciplinary conversation around reconceptualizing science education in the era of the Anthropocene Drawing educators from many walks of life and areas of practice together in a creative work that helps reorient science education toward the problems and peculiarities associated with this contemporary geologic time This work continues the mission of transforming the ways communities inherit science and technology education its knowledges practices policies and ways of living with Nature Our understanding of the Anthropocene is necessarily open and pluralistic as different beings on our planet experience this time of crisis in different ways This second volume continues to nurture productive relationships between science education and fields such as science studies environmental studies philosophy the natural sciences Indigenous studies and critical theory in order to provoke a science education that actively seeks to remake our shared ecological and social spaces in the coming decades and centuries This is an open access book *School and Society* James McKeen Cattell, Raymond Walters, 1921 **The Southern Educational Journal**, 1897 Chinese Affairs ..., 1922 **The Journal of Proceedings and Addresses of the National Educational Association** National Educational Association (U.S.), 1873 *Bulletin* Catholic Educational Association, 1908 Nov issue includes Proceedings of the annual meeting Biennial Report of the President, 1922 Museums Journal Elijah Howarth, F.
