First Picture Edward Steichen:

Photography in Children's Literature Elina Druker, Bettina Kümmerling-Meibauer, 2023-10-15 Photography in Children's Literature is the first study that examines the wide array of artistic techniques topics and genres used within photographic books for children Covering a time period from the 1870s to the 1980s the collection offers multifaceted insights into changing perceptions of children and childhood during an era when the world changed in unprecedented ways More than sixty full color illustrations demonstrate an impressive variety of genres from ABC books concept books and country portraits to photo reportage and poetry By discussing photographic books from ten countries and three continents the collection offers an international scope providing a glimpse into the production and reception of photography in children's literature in a range of contexts and cultures Photographic books for children thus open up new vistas for scholars interested in an interdisciplinary and transnational investigation of children's literature text and images across the centuries

On Display: Visual Politics, Material Culture, and Education Karin Priem, Kerstin te Heesen, 2016 This book focuses on one of the most successful photography exhibitions in history The Family of Man With The Family of Man as its reference point this collection of essays takes a closer look at visual and material objects It examines their relevance for educational issues and exhibition designs We understand these issues in their broadest sense to encompass processes of citizenship and identity formation and the adoption and or preservation of ethical and political values with effects that range from the micro to the macro from the national to the international level The overall hypothesis of this volume is that images objects and designs were created and employed as performers and performances that interacted with and attracted mass audiences This book not only looks at how the presentational representational and social power of images objects and designs was deliberately used by political and cultural stakeholders during the mid 1950s but also how these technologies of display travelled through time and space and as historical objects interacted and continue to interact with new contexts and audiences

Emergent Literacy Bettina Kümmerling-Meibauer, 2011 This edited volume constitutes the first serious sustained examination of the study of children's books for children aged from 0 to 3 with contributions by scholars working in different domains and attempting to assess the recognition of the role and influence of children's literature on the cognitive linguistic psychological and aesthetic development of young children This collection achieves a balance between theoretical empirical historical and cross cultural approaches by examining the broad range of children's books for children under three years of age ranging from early concept books through wimmelbooks and ABC books for small children to picture books that support the young child's acquisition of behavioral norms Most importantly the chapters proffer new insights into the strong relationship between children's books for young children and emergent literacy drawing on current research in children's literature research visual literacy cognitive psychology language acquisition picture theory and pedagogy **Real**

Fantasies Patricia Johnston, 2023-11-15 During the 1920s and 1930s Edward Steichen was the most successful photographer

in the advertising industry Although much has been said about Steichen's fine art photography his commercial work which appeared regularly in *Vanity Fair* *Vogue* *Ladies Home Journal* and almost every other popular magazine published in the United States has not received the attention it deserves At a time when photography was just beginning to replace drawings as the favored medium for advertising Steichen helped transform the producers of such products as Welch's grape juice and Jergens lotion from small family businesses to national household names In this book Patricia Johnston uses Steichen's work as a case study of the history of advertising and the American economy between the wars She traces the development of Steichen's work from an early naturalistic style through increasingly calculated attempts to construct consumer fantasies By the 1930s alluring images of romance and class developed in collaboration with agency staff and packaged in overtly manipulative and persuasive photographs became Steichen's stock in trade He was most frequently chosen by agencies for products targeted toward women his images depicted vivacious singles earnest new mothers and other stereotypically female life stages that reveal a great deal about the industry's perceptions of and pitches to this particular audience Johnston presents an intriguing inside view of advertising agencies drawing on an array of internal documents to reconstruct the team process that involved clients art directors account executives copywriters and photographers Her book is a telling chronicle of the role of mass media imagery in reflecting shaping and challenging social values in American culture During the 1920s and 1930s Edward Steichen was the most successful photographer in the advertising industry Although much has been said about Steichen's fine art photography his commercial work which appeared regularly in *Vanity Fair* *Vogue* *Ladies Ho*
