**Eric V. Linder**

## **First Principles Of Cosmology:**

*First Principles of Cosmology* Eric V. Linder, 1997 An introduction to cosmology this text has an emphasis on the basic principles of the subject It seeks to explain the application of mechanics thermodynamics and particle physics to questions on the universe as a whole The volume also explores general equations of state unifying the treatment of dust radiation cosmological constant or exotic components and the treatment of inhomogeneities clumpy universe and their effects on observations

**God the Creator** Robert Cummings Neville, 1992-02-13 God the Creator provides a detailed exposition of a conception of God as the creator of everything determinate It does not defend an established conception such as the Thomist the Calvinist or the Process theological idea but rather elaborates the ancient theme of creation ex nihilo in a new form appropriate to the contemporary world Part one is a rigorous philosophical development of the idea of God as creator ex nihilo arguing that an adequate solution to the problem of the one and the many demands such a conception This part includes a dialectical examination of contemporary and classical theories of being Part two asks how one can have knowledge of the kind of God described previously it deals with experience analogy and dialectic Part three applies the conception developed in part one to fundamental religious conceptions such as the object of worship the nature of religion and the practices of private and public religious life It presents theories arising from the conception of creation ex nihilo for the interpretation of religious concern conversion faith certainty solitude bliss service liturgy providence evangelism dedication reconciliation brotherhood discipline the integration of public and private religion relative to other dimensions of life freedom love and glory Though the language arises from the Christian tradition and expresses an orthodox strand of that religion the argument weaves throughout the concerns of many world religions

**Philosophy and the Sciences for Everyone** Michela Massimi, 2014-09-25 What is the origin of our universe What are dark matter and dark energy What is our role in the universe as human beings capable of knowledge What makes us intelligent cognitive agents seemingly endowed with consciousness Scientific research across both the physical and cognitive sciences raises fascinating philosophical questions Philosophy and the Sciences For Everyone introduces these questions and more It begins by asking what good is philosophy for the sciences before examining the following questions The origin of our universe Dark matter and dark energy Anthropic reasoning in philosophy and cosmology Evolutionary theory and the human mind What is consciousness Intelligent machines and the human brain Embodied Cognition Each chapter includes an introduction summary and study questions and there is a glossary of technical terms Designed to be used on the corresponding Philosophy and the Sciences online course offered by the University of Edinburgh this book is also a superb introduction to central topics in philosophy of science and popular science

**Nature and Divinity in Plato's Timaeus** Sarah Broadie, 2011-11-10 Plato's Timaeus is one of the most influential and challenging works of ancient philosophy to have come down to us Sarah Broadie's rich and compelling study proposes new interpretations of major elements of the Timaeus including the separate Demiurge the cosmic beginning the

second mixing the Receptacle and the Atlantis story Broadie shows how Plato deploys the mythic themes of the Timaeus to convey fundamental philosophical insights and examines the profoundly differing methods of interpretation which have been brought to bear on the work Her book is for everyone interested in Ancient Greek philosophy cosmology and mythology whether classicists philosophers historians of ideas or historians of science It offers new findings to scholars familiar with the material but it is also a clear and reliable resource for anyone coming to it for the first time *A History of Philosophy*

Johann Eduard Erdmann,1897 **Recovery of the Measure** Robert Cummings Neville,1989-08-15 The world is as we interpret it Arguing that this assumption is a major and pervasive error Neville demonstrates that the world is the measure of our interpretations Distinguishing two traditions of hermeneutics the continental tradition focusing on the interpretation of texts and the American tradition on the interpretation of nature Neville argues that since interpretation itself is part of the natural world a philosophical vision of nature must be restored to currency in order to provide an interpretive theory of the world that can be a measure of interpretation The natural world must be construed richly enough to be inclusive of human intention and purpose By taking the discussion of hermeneutics from the context of textuality and placing it within that of nature Recovery of the Measure provides a non modernist and non postmodernist theory of interpretation The first four chapters and the last four constitute a hermeneutical theory addressing contemporary problems of interpretation situated in the context of the philosophy of nature The middle chapters provide a compact philosophy of nature dealing with being identity value space time motion and causation **Catalogue of All Books in the Circulating and Reference**

**Departments of the Public School Library, Columbus ...** Columbus (Ohio). Public School Library,1897 The Intellectual World of Late Antique Christianity Lewis Ayres,Michael W. Champion,Matthew R. Crawford,2023-10-26 The Intellectual World of Late Antique Christianity explores new perspectives on early Christian epistemology in relation to the changing discourses institutions and material culture of late antiquity Early Christian modes of knowing and ordering knowledge involved complex processes of appropriation reproduction and reconfiguration of Jewish and classical epistemologies This helped Christians develop cultures of interpretation and argument as textually oriented religious communities within the Roman Empire and beyond It laid an intellectual foundation that would be built upon and modified in a variety of later contexts Encompassing Greek Latin and Syriac Christianity and an historical arc that stretches from the New Testament to Bede this volume traces how diverse theological commitments resulted in distinctive Christian accounts of knowing It foregrounds the myriad ways in which early Christian epistemology was embedded in earlier intellectual traditions and forms of life and how they established norms for communal life and powerful ways of acting in the world
