Fish Processing Technology George M. Hall, 2012-12-06 As with the first edition this book includes chapters on established fish processes and new processes and allied issues The first five chapters cover fish biochemistry affecting processing curing surimi and fish mince chilling and freezing and canning These established processes can still show innovations and improved theory although their mature status precludes major leaps in knowledge and technology The four chapters concerned with new areas relevant to fish processing are directed at the increasing globalisation of the fish processing industry and the demands from legislation and the consumer for better quality safer products One chapter reviews the methods available to identify fish species in raw and processed products The increased demand for fish products and the reduced catch of commercially important species has lead to adulteration or substitution of these species with cheaper species The ability to detect these practices has been based on some elegant analytical techniques in electrophoresis

Fish Technology S. V. Sangameswaran, M. V. Gopinath, M. S. Shetty, 1975 *Introduction to Fish Technology* Joe M. Regenstein, Carrie E. Regenstein, 1991 **Department of the Interior and Related Agencies Appropriations for 1997** United States. Congress. House. Committee on Appropriations.
