The Fisheries Exhibition Literature ... ,1884 *Hidden History of Rockland & St. George* Jane Merrill,2022 Down

East Maine is well known for its breathtaking scenery and art museums. However, much of the history in the traditional mining and fishing area of Rockland and St George remains untold. Hanson Gregory from Clam Cove invented the donut. Mary Brown Patten sailed a clipper around Cape Horn. Captain Albert Keller was shipwrecked on Easter Island, and Effie Canning of Rockland composed the lullaby "Rock a Bye Baby." Captain Charles Holbrook of Tenants Harbor and his ship the Hattie Dunn fell victim to a German U boat in the Atlantic. Local author Jane Merrill uncovers the forgotten stories and personalities that bring this unique area's history into focus.

Making Mathematics with Needlework Sarah-Marie Belcastro, Carolyn Yackel, 2007-12-12. Mathematical craftwork has become extremely popular, and mathematicians and crafters alike are fascinated by the relationship between their crafts. The focus of this book, written for mathematicians, needleworkers, and teachers of mathematics, is on the relationship between mathematics and the fiber arts, including knitting, crocheting, cross stitch, and quilting. Each chapter starts with an overview of the mathematics and the needlework at a level understandable to both mathematicians and needleworkers, followed by more technical sections discussing the mathematics, how to introduce the mathematics in the classroom through needlework, and how to make the needlework project, including patterns and instructions.

The Awards of the International Juries Confirmed and Issued by the Commissioners Acting on Behalf of Her Majesty's Government, 1884 *Entanglements* Tora Johnson, 2007-09-23. Entanglements explores the clash of cultures and personalities among fishermen, scientists, and whale advocates struggling to save both the endangered North Atlantic right whale and the livelihoods of thousands of Atlantic coastal families. By most counts, about 300 of these whales remain in the North Atlantic, and scientists warn that collisions with fishing gear are contributing to their decline. The political climate that surrounds the world's most endangered large whale is contentious, complex, and heartrending. Without pointing fingers or laying blame, Tora Johnson explores every side of the issue. She takes us to sea with fishermen who struggle to stay in business, setting traps and gillnets in the whale's habitat, and with members of the rescue teams who attempt to cut away deadly rope and net from whales in the wild. Weaving their stories and her personal observations into a discussion of the science and history of the conflict, she offers an admirable balance of perceptions, backgrounds, and agendas. Her thoughtful discussion of the plight of fishermen and whales, and of the frustrations between fishing communities and conservationists, presents an authentic microcosm of the global conflict between human demands on the environment and nature's finite capacity for supporting those demands.
