Energy Poker Game:

The Energy Poker Game James Laxer, 1970 **Sustainable Freedom?** Edùardo A Platon, 2023-09-22 This book conceived in the 2010s demonstrates that the thesis of renewable energy prevailed Despite still having a long way to go after the epic battle between the forces of maintaining fossil fuels in the energy market in Brazil and in the U S and the favorable winds of energy and renewable energy infrastructure projects renewables advanced quickly and are here to stay whether we like it or not Renewable energy developments that have taken place in the past decade from 2010 when this book was conceived to 2020 shaped the way we humans function in society In this book the author highlights the beginning of the history of the oil industry in Brazil and oil in the US and the bold and baby steps towards renewables The rest is history validating itself in the daily life of the third decade of the 21st century until we reach the massive scale of the electric vehicle industry already represented by Tesla Li Auto NIO Lucid Motors Rivian among others Indeed we see a great change and orientation towards sustainability In this case the direction became more important than the speed of implementation of the green global diversified future The question in the current chapter of humanity is whether the concept of sustainability will be expanded to reach the political dimension through the current weakening of Western democracies in the modern world facing massive challenges such as global pandemics the emergence and rapid expansion in all economic sectors and industries of artificial intelligence robotics not to mention the threats of nuclear wars and cyber attacks between nations and global environmental devastation

Power, 1929 **Stupid to the Last Drop** William Marsden, 2007 A bestselling investigative journalist takes a tour of the Alberta oil and gas industry revealing how Canada s richest province is squandering our chance for a sustainable future In its desperate search for oil and gas riches Alberta is destroying itself As the world teeters on the edge of catastrophic climate change Alberta plunges ahead with uncontrolled development of its fossil fuels levelling its northern Boreal forest to get at the oil sands and carpet bombing its southern half with tens of thousands of gas wells In so doing it is running out of water destroying its range land wiping out its forests and wildlife and spewing huge amounts of greenhouse gases into the atmosphere adding to global warming at a rate that is unrivalled in Canada or almost anywhere else in the world It s digging drilling and blasting its way to oblivion becoming the ultimate symbol of Canada s and the world s pathological will to self destruct Nowhere has the world seen such colossal environmental destruction as is being wreaked on Alberta At one point the province even went so far as to consider a scientist s idea of nuking its underbelly to get at the tar sands **Stupid to the Last Drop** looks at the increasingly violent geopolitical forces that are gathering as the world s gas and oil dwindle and the Age of Oil begins its inevitable slide towards oblivion As Canadians deplete their energy reserves selling them off to Americans at bargain basement prices no thought is given to conservation or the long term needs of the nation In this powerful polemic William Marsden journeys across the heart of a province seized by the destructive forces of greed power and the energy business and envisions a very bleak future

Electric Power, 1893 **The Future of Power** Joseph S Nye Jr, 2011-02-01 The Future of Power examines what it means to be forceful and effective in a world in which the traditional ideas of state power have been upended by technology and rogue actors Joseph S Nye Jr a longtime analyst of power and a hands on practitioner in government delivers a new power narrative that considers the shifts innovations bold technologies and new relationships that are defining the twenty first century He shows how power resources are adapting to the digital age and how smart power strategies must include more than a country s military strength At the beginning of the twenty first century unsurpassed in military strength and ownership of world resources the United States was indisputably the most powerful nation in the world Today China Russia India and others are increasing their share of world power resources Information once reserved for the government is now available for mass consumption The Internet has literally put power at the fingertips of nonstate agents allowing them to launch cyberattacks from their homes The cyberage has created a new power frontier among states ripe with opportunity for developing countries To remain at the pinnacle of world power the United States must adopt a strategy that designed for a global information age
