Mills,Emmanuel Raufflet,2017-09-08 This second collection of outstanding shortlisted contributions from the Critical Management Studies CMS Interest Group of the Academy of Management AOM Dark Side case writing competition continues to go where other business case studies fear to tread There are very many case studies of business best practice when engaging with social environmental and ethical issues But when educators look for resources to illustrate to students the more typical examples of bad let alone scandalous practices of some firms the cupboard is almost entirely bare And yet there is a critical need for business educators to expose students and managers to such issues to understand the different multifaceted phenomena of our late capitalist era to support critical reflective moral development and to reflect and understand the complexities of organizational life To argue that such cases deal with the bad apples in an otherwise functioning system misses the point Whether focusing on the phone hacking scandals at national newspapers the influence of big pharma companies on clinical trials the Bhopal tragedy or the use of child labour in the garment industry the problems discussed are of major importance

and in many cases have been demonstrated to be common practice for particular companies Good news they are not but all are stimulating and present students with dilemmas and decisions to make in a myriad of ways Each of these 14 selected cases from 2009 2012 has been thoroughly documented peer reviewed and edited They cover four continents Asia the Americas Europe and Oceania and both business and public organizations The industries covered range from extractive industries the energy industry consumer products pulp and paper movies media municipal affairs academia banking and the drug industry The book is split into three sections Community and Environment Human Rights and Business and Ethics and Policy Online Teaching Notes to accompany each chapter are available on request with the purchase of the book

The Danger of Change Robert Waska,2014-02-25 Confusing clinical standoffs loyalty to self destruction and abrupt terminations are challenging and under examined problems for the modern psychoanalytic practitioner The Danger of Change is a timely book that addresses the so called resistant patient so many clinicians are familiar with Robert Waska blends theory based on Melanie Klein s classical stance with the more contemporary Freudian Kleinian school to demonstrate how to understand patients that are resistant to progress Divided into four sections this book covers reluctant patients and the fight against change caught between the paranoid and depressive world greed and the dangers of change interruptions to the process of change loss envy and the death instinct working toward change in the face of overwhelming odds Extensive and detailed clinical material is used to bring clarity to subjects including symbolism conflict resolution projective identification the depressive and paranoid positions change and trust The Danger of Change brings hope and clarity to cases involving patients who experience progress as a threat to their emotional wellbeing It will be of great interest to all practising psychoanalysts as well as those studying psychoanalytic theory and practice

Fictions of Home Martin Mühlheim,2018-04-23 This study aims to counter right wing discourses of belonging It discusses key theoretical concepts for the study of home focusing in particular on Marxist feminist postcolonial and psychoanalytic contributions The book also maintains that postmodern celebrations of nomadism and exile tend to be incapable of providing an alternative to conservative xenophobic appropriations of home In detailed readings of one film and six novels a view is developed according to which home as a spatio temporal imaginary is rooted in our species being and as such constitutes the inevitable starting point for any progressive politics

Men of the Mean Streets: Gay Noir Greg Herren,J.M.
