While originally created as reserves for beautiful landscapes and endangered species protected areas in Europe were subsequently used as a means to preserve whole ecosystems with restrictions on human activities and impacts More recently protected areas are also being considered as instruments for regional development particularly in marginal regions facing severe economic and socio cultural problems Contrary to previous conservation focused policies new approaches aim to blend conservation and development functions making protected areas real living landscapes and integrating activities such as agriculture forestry handicrafts tourism and education with the conservation and sustainability aspects The past decade has seen a marked increase in these innovative and dynamic types of protected areas However the policies of individual European countries are very varied This volume provides a comprehensive overview of the relationship between protected areas and regional development policies both in theory and practice Illustrated with a wide range of case studies from across Europe it compares the different concepts strategies and instruments being used In conclusion it suggests the most innovative and successful ways to use protected areas for regeneration and sustainable regional development *Unasylva* ,2013 *The Pan-European Biological and Landscape Diversity Strategy* ,1996 **Habitats for Birds in Europe** Graham M. Tucker,M. I. Evans,1997 The greatest threats to Europe s birds and biodiversity come from loss and degradation of habitat This book brings together more than 190 bird and habitat conservation experts from all over Europe to examine the threats to Europe s eight major habitat types and propose policies and actions to protect and restore them Although the emphasis is on birds particularly the 40 percent of European species with an unfavourable conservation status many recommendations would help conserve all elements of biodiversity in the wider European environment An important contribution to the conservation of biodiversity in Europe Peter L Nielsen European Commission An extremely valuable reference for bird conservationists in any continent *The Wilson Bulletin* *Das Schweizer Buch* ,2005 [Linking Protected Areas with Working Landscapes Conserving Biodiversity](#) Neil Munro,J. biodiversity and other natural resources can best be conserved on an ecosystem or regional scale which may or may not be consistent with political boundaries Efforts to protect land on an ecosystem scale have led to the creation of numerous transboundary protected areas also referred to as international peace parks or transfrontier conservation areas These areas which often cross linguistic socioeconomic and cultural boundaries as well as national borders represent regional conservation at its most complex While many scientists and practitioners promote eco regional approaches to conservation many also advocate pursuing conservation goals on local or community scales Conservationists therefore endeavor to achieve a seemingly incongruous mandate to pursue top down regional goals using bottom up local approaches Transboundary Protected Areas The Viability of Regional Conservation Strategies addresses the vital questions associated with this mandate Is it reasonable and realistic to approach regional conservation this way What strategies have been employed to achieve these goals and how successful have they been Who benefits from transboundary conservation and what are the costs Reflecting the information delivered at the 2001 conference of the Yale chapter of the International Society of Tropical Foresters ISTF this book provides you with the best answers available at this time The contributors include social and natural scientists resource managers policymakers and community leaders Transboundary Protected Areas The Viability of Regional Conservation Strategies brings them together for an interdisciplinary exploration of these questions and other critical issues related to conservation in and around transboundary protected areas Specific cases that are thoughtfully examined in Transboundary Protected Areas The Viability of Regional Conservation Strategies include the public reaction to the Yellowstone to Yukon Y2Y Conservation Initiative the ways in which the establishment of southern Africa s existing and proposed Transfrontier Conservation Areas TFCAs can help conserve biodiversity aid socioeconomic development and promote international peace development and conservation efforts in the Maloti Drakensberg mountains of southern Africa which straddle the borderlands between South Africa and Lesotho the cultural aspects of protected area management in Venezuela and Guyana the impact of transfrontier collaboration as evidenced by the International Gorilla Conservation Programme IGCP in the Virunga Bwindi region of Africa Uganda Rwanda and the Democratic Republic of Congo how the Nepalese have addressed the problems of poaching commercial logging illegal harvesting and smuggling of forest products and illegal trade of wildlife and wildlife products in the eastern Himalayas by implementing a transboundary biodiversity conservation initiative Helpful maps tables and figures make geographical regions and conservation information easy to assimilate
