The Principles of Pure Crystallography Gustav Dethlef Hinrichs, 1871

Levinas Faces Biblical Figures Yael Lin, 2014-03-20 This collection of essays is an attempt to capture the drama of the encounter of the facing of Levinas and the biblical text It seeks to link Jewish experience and Levinasian themes such as responsibility substitution hospitality suffering and forgiveness and at the same time make the biblical text accessible in a new way The book offers new insights on the opening up of Levinas s thought and biblical stories to one another it considers the ways in which Levinas can open up the biblical text to questioning and how the biblical text can inform our reading of Levinas Setting up in dialogue the heteronomic texts the narrative texts of the bible and Levinas s philosophical texts allows an enforced and renewed understanding of both The examination of these issues is pursued from diverse perspectives and disciplines probing the role biblical figures play in Levinas s thought and the manner by which to approach them Do the biblical allusions serve in Levinas s thought merely as a rhetorical and literary device as illustrations of his ideas or perhaps they have a deeper philosophical meaning which contributes to his project in general Do the references to biblical figures work in Levinas s philosophy in a way that other literary figures are incapable of and how do these references comply with his conflicted attitude towards literature

Hyperbolic Knot Theory Jessica S. Purcell, 2020-10-06 This book provides an introduction to hyperbolic geometry in dimension three with motivation and applications arising from knot theory Hyperbolic geometry was first used as a tool to study knots by Riley and then Thurston in the 1970s By the 1980s combining work of Mostow and Prasad with Gordon and Luecke it was known that a hyperbolic structure on a knot complement in the 3 sphere gives a complete knot invariant However it remains a difficult problem to relate the hyperbolic geometry of a knot to other invariants arising from knot theory In particular it is difficult to determine hyperbolic geometric information from a knot diagram which is classically used to describe a knot This textbook provides background on these problems and tools to determine hyperbolic information on knots It also includes results and state of the art techniques on hyperbolic geometry and knot theory to date The book was written to be interactive with many examples and exercises Some important results are left to guided exercises The level is appropriate for graduate students with a basic background in algebraic topology particularly fundamental groups and covering spaces Some experience with some differential topology and Riemannian geometry will also be helpful

The Divine Face in Four Writers Maurice Hunt, 2015-12-17 An important contribution to studies in literature and religion The Divine Face in Four Writers traces the influence of Christian and Classical prototypes in ideas and depictions of the divine face and the centrality of facial expressions in characterization in the works of William Shakespeare Fyodor Dostoyevsky Hermann Hesse and C S Lewis Maurice Hunt explores both the human yearning to see the divine face from post Apostolic time to the 20th century as reflected in religion myth and literature by writers such as Augustine Shakespeare Hardy and

Dostoyevsky as well as the significance of the hidden divine face in writings by Spenser Milton Hesse and Lewis A final coda briefly detailing Emmanuel Levinas s system of ethics based on the human face and its encounters with other faces allows Hunt to focus on specific moments in the writings of the four major writers discussed that have particular ethical value
