**Under the Bed of Heaven** Richard W.

McCarty, 2021-12-01 Under the Bed of Heaven is a work of Christian ethics that examines how eschatology might reshape

concepts of sexual morality With the rise of institutional Christianity in the Roman Empire Christian attitudes about sexual desire and activity were soon controlled by doctrines of virginity and celibacy or monogamous marriage for the sake of procreation These moral theologies aligned with a certain track of Christian eschatology which imagined the future resurrection of the body but without any corresponding sexual desires As a result traditional Christianity developed a preference for celibacy on earth to match the loss of sexual desire and activity in heaven making marriage and monogamy temporal goods only In recent years a few scholars of religion have challenged whether this vision of a sexless heaven is valid However they have not fully developed a vision of sex in heaven that might function to critique and reform Christian sexual ethics on earth Richard W McCarty explores scripture church teachings and different models of eschatology to offer a bold new conception of Christian sexual ethics that is inclusive of LGBTQ and heterosexual people both in and outside of monogamous configurations

*Between Heaven and Earth* Maxime A. Collin, 2021-06-07 Our understanding of modern power politics usually relies on simple linear narratives which tend to obfuscate complex systems Sociological and historical connections in particular are eschewed in favor of national histories and short term analysis Yet actors tend to found their intents and actions on complex kinetics rooted in their core identities To study the way identity is built and expressed opens the way for a more comprehensive analysis of actors on the international stage through a recontextualization of social competition and the mechanisms of fear hate and sacrifice These kinetics also shine a light on the new contemporary facets of power which no longer exists as a unilateral flux but rather as a combination of action expression and shaping of the superstructure The example of the East China Sea one of the most crucial lynch points of the 21st century offers concrete evidence of this model s heuristic and prospective value and opens the way for further development of analysis of complex systems as a science
