Design for Ecological Democracy Randolph T. Hester,2006 Over the last fifty years the process of community building has been lost in the process of city building City and suburban design divides us from others in our communities destroys natural habitats and fails to provide a joyful context for our lives In Design for Ecological Democracy Randolph Hester proposes a remedy for our urban anomie He outlines new principles for urban design that will allow us to forge connections with our fellow citizens and our natural environment He demonstrates these principles with abundantly illustrated examples drawn from forty years of design and planning practice showing how we can design cities that are ecologically resilient that enhance community and that give us pleasure Hester argues that it is only by combining the powerful forces of ecology and democracy that the needed revolution in design will take place Democracy bestows freedom ecology creates responsible freedom by explaining our interconnectedness with all creatures Hester s new design principles are founded on three fundamental issues that integrate democracy and ecology enabling form resilient form and impelling form Urban design must enable us to be communities rather than zoning segregated enclaves and to function as informed democracies A simple

bench at a centrally located post office for example provides an opportunity for connection and shared experience Cities must be ecologically resilient rather than ecologically imperiled adaptable to the surrounding ecology rather than dependent on technological fixes Resilient form turns increased urban density for example into an advantage And cities should impel us by joy rather than compel us by fear good cities enrich us rather than limit us Design for Ecological Democracy is essential reading for designers planners environmentalists community activists and anyone else who wants to improve a local community

**Prescription Games** Jeffrey Robinson, 2001 The major pharmaceutical companies according to John le Carr who has based his novel *The Constant Gardener* on their depredations are engaged in the systematic corruption of the medical profession country by country Jeffrey Robinson can back up that charge In *Prescription Games* Jeffrey Robinson exposes the yawning abyss between the claims to altruism made by pharmaceutical companies and the harsh reality of their everyday practice When the industry claims that the enormous markup they charge for new drugs pays the cost of developing new ones they don't say that as much as 80 per cent of R D money is actually directed at developing drugs designed to compete with existing brands or at creating variations on drugs whose patents are about to expire expenditures only the industry itself and its shareholders will benefit from Within the industry there are blockbuster drugs that create vast wealth for the companies that manufacture them Most are designed to treat conditions that are endemic among prosperous western populations that can afford them But there are no blockbuster drugs to treat diseases like tuberculosis cholera and malaria that ravage the Third World because Third World countries can't afford the prices People in Africa and Asia die from new strains of tuberculosis while people in Europe and North America are offered expensive treatments for obesity hair loss and sexual dysfunction In this hard hitting exposé Robinson also examines the extension of patent protection the end of generic drug competition in Canada the Nancy Olivieri scandal how a drug manufacturer fought to conceal research findings that would damage sales of its product the illicit drug trade and espionage among drug manufacturers
