Studies on the Social Construction of Identity and Authenticity J. Patrick

Williams, Kaylan C. Schwarz, 2020-08-03 As identity and authenticity discourses increasingly saturate everyday life so too have these concepts spread across the humanities and social sciences literatures Many scholars may be interested in identity and authenticity but lack knowledge of paradigmatic or disciplinary approaches to these concepts This volume offers readers insight into social constructionist approaches to identity and authenticity It focuses on the processes of identification and authentication rather than on subjective experiences of selfhood There are no attempts to settle what authentic identities are On the contrary contributors demonstrate that neither identities nor their authenticity have a single or fixed meaning

Chapters provide exemplars of contemporary research on identity and authenticity with significant diversity among them in terms of the identities cultural milieu geographic settings disciplinary traditions and methodological approaches considered Contributors introduce readers to a number of established and emerging identity groups from sites around the world from yogis and punks to fire dancers and social media influencers Their conceptual work stretches from the micro analytic to the ethno national as authors employ a variety of qualitative methods including ethnographic fieldwork interviewing and the collection and analysis of naturally occurring interactions Several of the chapters look directly at identification and authentication while others focus on the social and cultural backdrops that structure these practices what unites them is the adoption of social constructionist sensibilities This book will appeal to anyone interested in understanding identity and authenticity

Tribal Dancing and Social Development Wilfrid Dyson Hambly, 1927

The North American Indian: The Tiwa. The Keres Edward S. Curtis, 1926 A comprehensive and permanent record of all the important tribes of the United States and Alaska that still retain to a considerable degree their primitive customs and traditions The value of such a work in great measure will lie in the breadth of its treatment in its wealth of illustration and in the fact that it represents the result of personal study of a people who are rapidly losing the traces of their aboriginal character and who are destined ultimately to become assimilated with the superior race It has been the aim to picture all features of the Indian life and environment types of the young and the old with their habitations industries ceremonies games and everyday customs Though the treatment accorded the Indians by those who lay claim to civilization and Christianity has in many cases been worse than criminal a rehearsal of these wrongs does not properly find a place here
