Madeleine Dunphy

Gopher Tortoises:

Gopher Tortoise Ray E Ashton, 2004-06 Full color book for children ages 10 and up Details the life of the gopher tortoise and how it is tied in with other animals Also discusses how the encroachment into the gopher tortoise s habitat is affecting the environment and the tortoise **Gopher Tortoises** Christopher Blomquist, 2003-12-15 Meet nature's little bulldozer Gopher tortoises specially designed front legs allow them to dig deep into the ground creating homes for themselves and for dozens of other species that might not survive without them These tortoises do immeasurable good to their habitat by sifting soil and moving minerals to the surface They also help to spread seeds so that new plants can grow As they read kids will learn to appreciate this quiet helpful creature **At Home with the Gopher Tortoise** Madeleine Dunphy, 2012-10-21 At Home with the Gopher Tortoise The Story of a Keystone Species teaches young readers about the gopher tortoise and the more than 360 different kinds of animals that depend on it for survival From owls to rabbits from skunks to scorpions the gopher tortoise provides creatures with shelter food or a place to raise their young In this fascinating tale of ecological interdependency glorious illustrations reveal the gopher tortoise s world both below and above ground showing children how the fate of one species is important to so many others **Gopher Tortoises: Nature's Ecosystem Engineers!** Dr. Richard A. NeSmith, 2021-07-28 Most people have never seen an endemic North American gopher tortoise They have limited habits but can be found west and east of the Mississippi River There are small regions in the American southwest but the largest population is found in the Deep South particularly southeast Texas southeast Louisiana southern Mississippi Alabama Georgia southeastern South Carolina and most of Florida These land tortoises are threatened and federally protected Their importance in the ecosystem is vital They have been identified as keystone species as many plants and more than 350 other animals rely upon the gopher tortoises for survival Ensuring that gopher tortoises do not lose their habitats ensures that the ecosystem is healthy and vibrant At the current rate of change gopher tortoises will lose 20 percent of their habitat in the next 40 years **The Conservation Biology of Tortoises** IUCN/SSC Tortoise and Freshwater Turtle Specialist Group, 1989 **Gopher Tortoise Habitat Management, Strategies and Options** Gopher Tortoise Council. Meeting, 1988 *Gus the Gopher Tortoise: A Tortoise Tells His Story* Thomas Kibalo, 2019-03-20 This is a children s book about Gus a Gopher tortoise In this book Gus shares his life and story The book contains custom art illustrations to help Gus in his discussions Gus lives in a burrow located in sand dunes on the coast of Florida He describes in first person how Gopher tortoises live and eat and how they provide shelter to other creatures on the dunes Gopher tortoises are recognized as a keystone species in that their presence and activities are essential to the dunes ecology and the well being of different animals in that habitat Gus will introduced us to some of these animals Gopher tortoises are some of the oldest living land species here in Florida and are now threatened The threat comes mainly from humans that are competing with Gopher tortoises for their habitat Gus lets us know how we can help The book also describes conservation actions underway to help preserve the Gopher Tortoise

population Proceeds from sales of this book will go to the Friends of the Marine Science Center to support that center in their tortoise rescue efforts Gopher Tortoise Relocation Symposium Proceedings ,1989 **The Gopher Tortoise** Gopher Tortoise Council. Goodrich-Mahoney, Lawrence Abrahamson, Jennifer Ballard, Susan Tikalsky, 2011-08-11 The management of rights of way by electric and telephone utilities highway departments gas pipeline companies and railroads around the world is guided and constrained by policies and regulations to protect the environment Companies that manage rights of way are required to comply with these regulations and are seeking the most cost effective management practices that at the same time demonstrate stewardship of the environment Protection of biodiversity and sustainable development are especially important as national goals in many countries and rights of way managers are seeking practical ways to include public participation in their operations Addresses environmental issues in rights of way planning and management Provides a forum for information exchange among various agencies industries environmental consultants and academic organizations Presents peer reviewed papers to help achieve a better understanding of current environmental issues involved in rights of way management *Burrow and Habitat Relationships of the Gopher Tortoise in Coastal Scrub and Slash Pine Flatwoods on Merritt Island, Florida* ,1988 Biology of North American Tortoises National Biological Survey (U.S.), 1994 **Southeast Expansion Project** ,2007 **Habitat Selection by the Gopher Tortoise (Gopherus Polyphemus)** .,2007 The gopher tortoise *Gopherus polyphemus* occurs in the southeastern Coastal Plain and has experienced widespread decline due to habitat loss and other human impacts The largest remaining populations occur on private lands and military installations Proper management at these sites will be critical to the success of the species The goal of this study was to determine the response of gopher tortoises to forestry management practices commonly implemented in the management of the redcockaded woodpecker We monitored habitat use of individual tortoises at four study sites with different ownership and management scenarios Fort Gordon military installation winter burning Savannah River Site federal defense facility winter burning translocated population Tillman Sand Ridge state wildlife preserve summer burning and a private hunting preserve no management Habitat data were collected to characterize typical canopy and herbaceous vegetation of each site Data were collected at active burrows the anecdotal belief that tortoises select the most open habitat available was confirmed The preferred habitat density appears to be in the range of 40 percent canopy cover a value compatible with current woodpecker management guidelines Results will be used to develop recommendations for the concurrent management of gopher tortoises and red cockaded woodpeckers Southeast Supply Header Project ,2007 **Copeia** ,1918 The Natural History and Management of the Gopher Tortoise *Gopherus*

Polyphemus (Daudin) Ray E. Ashton, Patricia Sawyer Ashton, 2008 This handbook is the first book on tortoise management and research techniques that can be applied to any species It is designed to be the manual that can serve for certification for various institutions and State and Federal agencies Many tricks of the trade on how to count burrows excavate and trap tortoises are given based on the 20 years of experience of the Ashtons No other publication currently exists that brings together all the methods and techniques for tortoise management which can be used with other tortoises and turtles Students and environmental consultants working with gopher tortoises and other upland species will find this handbook indispensable

Gopher Tortoise as Pets Dyson Octavia, 2025-09-29 INTRODUCTION TO GOPHER TORTOISES This section gives a solid practical grounding you can drop into a care manual educational booklet or policy briefing It covers species identity and natural history the exceptional ecological keystone role they play and why people consider them as pets plus the important ethical and legal caveats that flow from those facts Species overview and significance Scientific identity and general appearance The gopher tortoise genus *Gopherus* is a terrestrial chelonian native to the southeastern United States It is a relatively large stocky ground dwelling tortoise with elephantine legs a high domed rough carapace and a sturdy flattened forelimb structure well adapted for digging Adults are medium sized compared with other tortoises they are substantially larger than small pet tortoise species but much smaller than giant tortoises Individuals show a range of shell shapes and coloration brown gray carapaces are typical and sexes can be dimorphic in subtle ways males sometimes have a longer tail and concave plastron Life history and longevity Gopher tortoises are long lived animals with slow life histories They grow and mature slowly and commonly live for multiple decades wild and captive individuals frequently survive into middle age and can reach 40 years or more under good conditions Because they mature late and have modest clutch sizes and relatively high juvenile mortality in the wild populations regenerate slowly Habitat and range general Gopher tortoises are tied to well drained sandy soils where they can excavate burrows Historically and ecologically they are characteristic of the longleaf pine wiregrass and other open fire maintained communities of the Southeastern Coastal Plain Their presence is strongly linked to habitat structure open canopy abundant native grasses and forbs and to the frequent low intensity fire regimes that keep those habitats open and productive Natural behaviour and diet They are primarily herbivorous grazing on a wide variety of grasses forbs and some browse They are diurnal and spend a large proportion of their time within or near their burrow systems foraging near the burrow entrance and thermoregulating in the sun They dig deep relatively stable burrows often several metres long and with a cooler moister chamber that provide refuge from temperature extremes predators and fire Keystone role in ecosystems Burrow engineers and ecosystem architects The single most important ecological fact about gopher tortoises is that they are ecosystem engineers Their burrows create stable microhabitats used by a large and taxonomically diverse assemblage of animals and plants Burrows buffer temperature and moisture extremes and are used as refuge nesting or overwintering sites by species that cannot dig comparable refuges themselves Examples of

burrow commensals include amphibians snakes small mammals birds invertebrates and other reptiles Biodiversity multiplier Because one burrow can be used by many different species seasonally or simultaneously healthy gopher tortoise populations multiply local biodiversity In areas where gopher tortoises are abundant the number of species associated with their burrows is markedly higher than in otherwise similar habitats without tortoises Ecosystem processes Beyond shelter tortoises influence the plant community selective grazing and seed dispersal soil turnover and aeration from digging and movement and nutrient redistribution around burrow areas Their grazing helps maintain open ground and a herbaceous layer favored by many specialist species In fire adapted systems their burrows also act as refugia for animals during burns helping many species survive periodic fires
