Good Clinical Practice In Assisted Reproduction:

Good Clinical Practice in Assisted Reproduction Paul Serhal, Caroline Overton, 2004-07 Utilizing the very latest assisted reproductive technologies this text provides an introduction to good clinical practice in the investigation and treatment of infertility There are chapters on clinical assessment of the male and the female followed by detailed chapters on the clinical procedures that can be put in place to help overcome infertility Also included is coverage of IVF GIFT and ZIFT and clinical aspects of PGD in addition to how to set up a successful IVF Unit

Benefits and Risks of Agonist Triggering Strategies Emanuele Garzia, Jan Tesarik, Francesco Maria Fusi, 2025-01-10 The use of GnRH agonists to trigger final oocyte maturation has gained momentum recently over the use of hCG in women at high risk for OHSS Because of the shorter duration of the agonist induced LH surge earlier demise of the corpus luteum CL is associated with a significant reduction in OHSS at the peril of decreased embryo implantation and increased pregnancy loss For this reason the effectiveness of GnRHa triggering was placed under scrutiny in fresh cycles while the quest for the most optimal strategies of luteal phase support LPS remains unresolved The adoption of a GnRH agonist trigger protocol with segmentation of the IVF cycle is one way of ensuring reproductive success without compromising patient safety Approval of this management approach however is subject to patients values and financial resources It is also dependent on the success of the cryopreservation program

Stem Cells in Clinical Practice and Tissue Engineering Rakesh Sharma, 2018-05-02 Stem Cells in Clinical Practice and Tissue Engineering is a concise book on applied methods of stem cell differentiation and optimization using tissue engineering methods These methods offer immediate use in clinical regenerative medicine The present volume will serve the purpose of applied stem cell differentiation optimization methods in clinical research projects as well as be useful to relatively experienced stem cell scientists and clinicians who might wish to develop their stem cell clinical centers or research labs further Chapters are arranged in the order of basic concepts of stem cell differentiation clinical applications of pluripotent stem cells in skin cardiac bone dental obesity centers followed by tissue engineering new materials used and overall evaluation with their permitted legal status

Values in Medicine Donald Evans, 2007-12-12 Written by a leading proponent of the philosophy and ethics of healthcare this volume is filled with thought provoking and frequently controversial ideas and arguments Accessibly written it provides readers with a timely contribution to the current literature on medical ethics in which the concept of subjectivity is a key issue characterizing current medical humanities Examining the critical assumption that scientifically demonstrable facts will remove all uncertainty the author argues that ethical dimensions of clinical practice do not always arise from undisputed facts but that they are sometimes to be found at the level of the determinations of the facts themselves Firmly placing the patient back on centre stage without underestimating the crucial role which science plays in modern medicine this volume is an excellent account of ethics and science in healthcare and their proper place in assessing and meeting people's health needs

Demonstrating Your Competence in Reproductive Health

Julian Jenkins,2005 APPRAISAL AND REVALIDATION SERIES The Appraisal and Revalidation Series helps doctors demonstrate their competence to the standard expected by the General Medical Council and to the standard expected if they are recognised as having special clinical interests It helps doctors gather evidence of their performance for appraisal and revalidation portfolios Revalidation will change the emphasis of regulation of doctors with an interest in reproductive medicine away from the qualifications of MRCOG or DRCOG towards regular assessment of a doctor s competence to practise and it will be incumbent upon the individual doctors whether in training or in substantive posts in primary or secondary care to reflect on their work and to demonstrate expertise within their special clinical interests This book will help to alleviate anxieties by removing the fear of the unknown through a series of concise chapters covering the crucial clinical areas in reproductive healthcare I commend the excellent practical advice on how to accumulate revalidation data by using practical examples based on cycles of evidence I envisage that many of us involved in the care of women will refer to this book time and time again It is an excellent contribution that will help doctors immensely in their preparation for the requirements of revalidation on all aspects of reproductive health Professor Steve Field in his foreword For more information on other titles in this series please click here
