**Fix-points And Factorization Of Meromorphic Functions: Topics In Complex Analysis** Chung-chun Yang, Qitai Zhuang, 1990-01-01 The fix points and factorization of meromorphic functions have become two research topics that have attracted many complex analysts attention throughout the world notably in U S China and Japan The first two chapters reintroduce Nevanlinna s theory of meromorphic functions and Montel s normal families theory for entire functions Based on these several theorems on fix points were derived The last two chapters introduce the factorization theory and the relationships between the fix points and factorization many recent results in factorization theory were reported and related open questions were raised for further study This book provides a timely introduction to some of the topics that are currently pursued by many complex analysts For instance the fix points of itrates of functions is closely related to the fractal mathematics which has just been realized to be useful in many branches of engineering and physics as well as in computer graphics
