**Ethics** Petr Alekseevich Kropotkin (kniꞑaꞑz'), N. Lebedev, Louis S. Friedland, Joseph R. Piroshnikoff, 1924 *The Origin and Development of the Moral Ideas* Edward Westermarck, 2020-09-28 THAT the moral concepts are ultimately based on emotions either of indignation or approval is a fact which a certain school of thinkers have in vain attempted to deny The terms which embody these concepts must originally have been used indeed they still constantly are so used as direct expressions of such emotions with reference to the phenomena which evoked them Men pronounced certain acts to be good or bad on account of the emotions those acts aroused in their minds just as they called sunshine warm and ice cold on account of certain sensations which they experienced and as they named a thing pleasant or painful because they felt pleasure or pain But to attribute a quality to a thing is never the same as merely to state the existence of a particular sensation or feeling in the mind which perceives it Such an attribution must mean that the thing under certain circumstances makes a certain impression on the mind By calling an object warm or pleasant a person asserts that it is apt to produce in him a sensation of heat or a feeling of pleasure Similarly to name an act good or bad ultimately implies that it is apt to give rise to an emotion of approval or disapproval in him who pronounces the judgment Whilst not affirming the actual existence of any specific emotion in the mind of the person judging or of anybody else the predicate of a moral judgment attributes to the subject a tendency to arouse an emotion The moral concepts then are essentially generalisations of tendencies in certain phenomena to call forth moral emotions However as is frequently the case with general terms these concepts are mentioned without any distinct idea of their contents The relation in which many of them stand to the moral emotions is complicated the use of them is often vague and ethical theorists instead of subjecting them to a careful analysis have done their best to increase the confusion by adapting the meaning of the terms to fit their theories Very commonly in the definition of the goodness or badness of acts reference is made not to their tendencies to evoke emotions of approval or indignation but to the causes of these tendencies that is to those qualities in the acts which call forth moral emotions Thus because good acts generally produce pleasure and bad acts pain goodness and badness have been identified with the tendencies of acts to produce pleasure or pain The following statement of Sir James Stephen is a clearly expressed instance of this confusion so common among utilitarians Speaking generally the acts which are called right do promote or are supposed to promote general happiness and the acts which are called wrong do diminish or are supposed to diminish it I say therefore that this is what the words right and wrong mean just as the words up and down mean that which points from or towards the earth's centre of gravity though they are used by millions who have not the least notion of the fact that such is their meaning and though they were used for centuries and millenniums before any one was or even could be aware of it **Multi-Religious Perspectives on a Global Ethic** Myriam Renaud, William Schweiker, 2020-11-29 Ratified by the Parliament of the World's

Religions in 1993 and expanded in 2018 Towards a Global Ethic An Initial Declaration or the Global Ethic expresses the minimal set of principles shared by people religious or not Though it is a secular document the Global Ethic emerged after months of collaborative interreligious dialogue dedicated to identifying a common ethical framework This volume tests and contests the claim that the Global Ethic s ethical directives can be found in the world s religious spiritual and cultural traditions The book features essays by scholars of religion who grapple with the practical implications of the Global Ethic s directives when applied to issues like women s rights displaced peoples income and wealth inequality India s caste system and more The scholars explore their respective religious traditions ethical response to one or more of these issues and compares them to the ethical response elaborated by the Global Ethic The traditions included are Hinduism Engaged Buddhism Shi i Islam Sunni Islam Confucianism Protestantism Catholicism Judaism Indigenous African Religions and Human Rights To highlight the complexities within traditions most essays are followed by a brief response by an expert in the same tradition Multi Religious Perspectives on a Global Ethic is of special interest to advanced students and scholars whose work focuses on the religious traditions listed above on comparative religion religious ethics comparative ethics and common morality **Annual Register** Stanford University,1900 Ethics, origin and development Petr Alekseevich Kropotkin (kni[a]z'),1924 *Principles And Laws In World Politics: Classical Chinese Perspectives On Global Conflict* Walter Wan Fai Lee,2021-12-02 The search for universal principles and laws in world politics is a colossal common task for all civilisations It should not be monopolised by the Western liberal paradigm Thirty years after the end of the Cold War global conflicts have been satisfactorily resolved neither by communism nor liberalism Humanitarian intervention now under the cover of the responsibility to protect R2P has destabilised many societies leaving justice undone This inspiring book invites debates on the post liberal imagination of emancipated Leviathan an almighty political authority which exercises awe and force to restore order as well as enshrines globally negotiated values of common conscience and reinvented cosmopolitanism Human well being will truly become reality when we synergise pre modern and pre liberal ways of thinking worldviews ethics and aesthetic styles by means of cross civilisational cross disciplinary fundamental research and let an emancipated Leviathan exercises principles and laws of virtue derived from the study The starting point of such intellectual innovation is China This book explores the application of classical Chinese resources to the innovation of thoughts in contemporary Chinese international relations IR It examines whether Knowledge Archaeology of Chinese International Relations KACIR coined by the author responds sensibly to today s issues of international ethics and global justice The book contends that emancipative hermeneutics holds the key to the Chinese soft power puzzle A bottom up non nationalistic and non ethnocentric approach to the Chinese civilisation will reinvent intellectual pluralism and cosmopolitan elements in the Chinese tradition that interact constructively with and ultimately transcend the liberal Western model Strolling from contemporary IR back to ancient Chinese philosophy then striding into the future searching for common principles and laws this insightful book is a must read
