**Evolution of Modern Metaphysics** A. W. Moore, 2012 This book charts the evolution of metaphysics since Descartes and provides a compelling case for why metaphysics matters

**On Language** Jon Burmeister, Mark Sentesy, 2021-02-10 Language was at the heart of philosophical inquiry for Plato and Aristotle and in contemporary discussion it is no less central In addition to the history of philosophy s extensive investigations of language analytic and continental philosophy too have focused intensively on the matter But since most inquiries into language remain enclosed in their own methodology terminology and tradition the multiplicity of approaches is often accompanied by their mutual isolation This book shows that these traditions can however speak meaningfully to each other on language rather than preventing dialogue their differences provide opportunities for fruitful inquiry The essays in this volume each treat a central topic in the contemporary study of language Part One addresses how expression determines thought according to Humboldt the use of paraphrase in Quine s semantic ascent and the non ambiguity of the Frege Russell senses of is Part Two includes treatments of the possibility and impossibility of promising in Nietzsche and Derrida s re working of Saussure s distinction between language and world Topics in Part Three include the origin and end of language for Heidegger and Foucault and the mutual sharpening of logic and ordinary speech in Anselm This book fills a gap in current scholarship by bringing together nine essays that through rejecting the debilitating yet often unquestioned divisions between disciplines are able to illuminate the fundamental nature of language

**The Certeau Reader** Michel de Certeau, 2000

The Existence of God Stig Børsen Hansen, 2010 This study breaks new ground on the question of the existence of God It innovatively combines biblical scholarship with an analysis of existence drawn from the writings of the philosopher Gottlob Frege It shows that the strength of Frege s approach is its emphasis on the notions of proper name and predicate this in turn sheds new light on important elements of theological language Finally the Fregean approach in this book is defended against objections drawn from readings of Ludwig Wittgenstein s *Tractatus Logico Philosophicus*

Sense and Self Christiane Schildknecht, 2002 The concept of nonpropositionality covers the vast field of those aspects of knowledge and experience that cannot be captured by a truth functional approach or escape conceptual analysis The book is confined to questions of theoretical philosophy Its first part provides an orientation within the nonpropositional jungle by critically following a historically beaten track the philosophy of Gottlob Frege It not only explains the propositional focus of Frege s epistemology logic and philosophy of language against the historical background of psychologism but focuses on the limits of this propositional approach The critical analysis of Frege s logicist project centres on its foundational basis definitions logically primitive terms elucidations of these terms as well as aspects of what Frege calls colouring The second part of the book echoes many of the central elements which mark the limits of Frege s propositional conception by dealing with the systematically pivotal role that the concept of nonpropositionality plays in contemporary analytical philosophy especially within epistemology and philosophy of mind Two main areas stand out theories of perception and the discussion of inner experience The focus here is on non epistemic

conceptions of seeing the non conceptual content of experience as well as on phenomenal consciousness and self consciousness The pivotal claim is that the nonpropositional constitutes the basis of and a necessary condition for the propositional Any attempt to embark on an analysis of the propositional and of propositional knowledge will float in the air unless the nonpropositional grounds are systematically secured The book aims to close this gap **Sats** ,2003 **The Reader's Adviser** Marion Sader,1994 Heartily recommended Since not even a reference librarian par excellence can come close to knowing the best in any given discipline no library should be without access to this set for its patrons Booklist impressively meets a quite formidable task providing basic material on many subjects for the nonspecialist student librarian Choice From age old classics to the writings of today The Reader s Adviser 14th Edition helps you and your patrons select and appreciate the world s greatest books This monumental work features hundreds of authors and thousands of works new to this edition plus updated entries and revised material in every chapter updated critical and biographical profiles reflecting the latest understanding and scholarship more women writers and more culturally diverse writers from around the world title name subject indexes in every volume Order the complete 6 volume set for only 500 00 a savings of 160 00 if you purchased each volume separately **Heidegger and the Philosophy of Logic** Gregory Damon Shirley,2006 Manuscrito ,2008

*The Philosophy of Jaakko Hintikka* Randall E. Auxier,Lewis Edwin Hahn,2006 One of the world s most influential logicians Jaakko Hintikka is a leading figure on the international philosophical scene Here he responds to his critics The 27 critical and descriptive essays in this book written by important scholars from a variety of fields challenge Hintikka s innovations in philosophy logic and linguistics His replies and the essays themselves all previously unpublished form a lively provocative exchange of ideas Also included is an intellectual autobiography and a complete bibliography of Hintikka s writings *The Cognitive Challenge to the Truth Conditional Theory of Meaning* Mark Warshaw,2005 Semiotica ,1989 Encyclopedia of Philosophy Donald M.
