Wildlife Feeding and Nutrition Charles T. Robbins, 2013-09-03 Wildlife Feeding and Nutrition fills a serious gap in the wildlife and animal nutrition literature by providing a discussion of the basic principles of nutrition and their application to the broader field of wildlife ecology This book is based on lectures presented in an upper level wildlife nutrition course taught at Washington State University The book opens with an introductory chapter on wildlife nutrition This is followed by separate chapters on general nutrient and energy requirements protein water vitamin and mineral requirements impact of nutrition on reproductive characteristics gastrointestinal anatomy and function and digestion and nutrient metabolism The text will be invaluable to wildlife biologists to those who are interested in captive animal nutrition and management and to those who are interested in improving the feed supply and nutrition of free ranging wildlife It should also be helpful to undergraduate and graduate students as well as teachers of biology and wildlife management The book will be a useful reference for all who are interested and concerned with wildlife throughout the world

The Feeding of Animals Whitman Howard Jordan, 2015-06-24 Excerpt from *The Feeding of Animals* This volume is the result of an effort to present the main facts and principles fundamental to the art of feeding animals as they are now understood It is not a statement of rules or of the details of practice for even if the author regarded himself as competent to discuss these he would hold it to be unwise to attempt to discriminate in practical matters so varied and so complex Neither has an effort been made to harmonize the whole mass of experimental data relating to animal nutrition Many of these data are of no value many are very incomplete and many are apparently conflicting so that more useful lessons can often be drawn from single events in the field of experiment and investigation than from the frequently doubtful testimony of summaries The author expresses the hope that what he has written will not be regarded as having for its ultimate object the mere exposition of feeding formulas
