Greek Miracle:

The Formation of the Greek People Auguste Jardé, 1926 **A People's History of Science** Clifford Conner, 2005-11-08
Challenges popular beliefs that credit such figures as Galileo Newton and Einstein with bringing about modern science explaining how everyday laborers participated in creating science and continue to do so today in an account that also documents how the development of science affects ordinary people Original *The Idea of Semitic Monotheism* Guy G. Stroumsa, 2021 The Idea of Semitic Monotheism examines some major aspects of the scholarly study of religion in the long nineteenth century from the Enlightenment to the First World War It aims to understand the new status of Judaism and Islam in the formative period of the new discipline Guy G Stroumsa focuses on the concept of Semitic monotheism a concept developed by Ernest Renan around the mid nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples cultures and religions This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages at the time of the Enlightenment and Romanticism Together with the rise of scholarly Orientalism this discovery offered new perspectives on the East as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations This innovative work studies a central issue in the modern study of religion Doing so however it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century up to the present day **The Origin of the History of Science in Classical Antiquity** Leonid I[A]kovlevich Zhmud', 2006 This volume is the first comprehensive study of the content form and goal of the Peripatetic historiography of science The book first analyses similar trends in Presocratic Sophistic and Platonic thought and then focuses on Aristotle's student **Decolonizing Science** David S. Jacobs, 2025-04-24 Science denial is on the rise globally Part of the reason for this is that science falsely portrayed as a solely European invention alienates most of the world This book traces the historical development of science and shows how its history and philosophy were shaped by Europe's colonial agenda Racial and gendered prejudices were converted into scientific concepts and the history of human civilization was repurposed to portray science as a European invention In the process it was ancient Greek scholars like Thales and Euclid who were credited with the invention of modern science Abstract theorizing became a defining characteristic of science and human experience became non essential Biodiversity including human diversity was viewed as consisting of discrete non overlapping types As a consequence humanity was divided into a hierarchy of races and genders This view of the world is divorced from reality and the reason why modern science struggles to explain humanity intelligence and life Using a more realistic historical perspective the author argues that racial and gendered identities are not relevant to science or any other sphere of human endeavour Instead the author advocates for realism that will make science logically consistent inclusive humane and relevant **Time and Western Man** Wyndham Lewis, 1928 *Ahepan*, 1929 **A History of Psychology**

Thomas Hardy Leahey,2017-10-02 A History of Psychology places social economic and political forces of change alongside psychology s internal theoretical and empirical arguments illuminating how the external world has shaped psychology s development and in turn how the late twentieth century s psychology has shaped society Featuring extended treatment of important movements such as the Enlightenment and the Scientific Revolution the textbook approaches the material from an integrative rather than wholly linear perspective The text carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology s technical concerns as a science and profession This new edition features expanded attention on psychoanalysis after its founding as well as new developments in cognitive science artificial intelligence and behavioral economics Throughout the book strengthens its exploration of psychological ideas and the cultures in which they developed and reinforces the connections between psychology modernism and postmodernism The textbook covers scientific applied and professional psychology and is appropriate for higher level undergraduate and graduate students

The Greek Miracle, by "Athenian". Pseud Athenian,1942 **Art in Greece** André de Ridder,Waldemar Deonna,1927 **Antiquity Now** Thomas E. Jenkins,2015-05-14 Written in a lively and accessible style Antiquity Now opens our gaze to the myriad uses and abuses of classical antiquity in contemporary fiction film comics drama television and even internet forums With every chapter focusing on a different aspect of classical reception including sexuality politics gender and ethnicity this book explores the ideological motivations behind contemporary American allusions to the classical world Ultimately this kaleidoscope of receptions from calls for marriage equality to examinations of gang violence to passionate pleas for peace or war reveals a classical antiquity that reconfigures itself daily as modernity explains itself to itself through ever expanding technologies and media Antiquity Now thus examines the often surprising redeployment of the art and literature of the ancient world a geography charged with especial value in the contemporary imagination
