**Evolution and Human Behavior** Alexander Alland, 1969

**That Complex Whole** Lee Cronk, 2019-05-20 Our understanding of the evolution of human behavior has grown enormously over the past few decades and an increasing number of behavioral and social scientists are making use of evolutionary theory in their work to shed light on issues ranging from marriage and parenting to the study of mental illness The success of this research program is three

*On the Evolution of Human Behavior* Peter C. Reynolds, 1981

Challenging many of the premises of conventional anthropological theory On the evolution of human behavior draws on recent evidence from psychobiology linguistics and ethology to trace the evolution of human social behavior from that of other primates Rejecting the assumption that significant behavioral discrepancies between man and other primate species stem from equally significant psychological differences Reynolds argues instead that small evolutionary changes may result in greatly increased complexity of behavior His frankly ethological theory of human origins assumes that reason and instinct evolve together and that instinctual mechanisms are necessary for the emergence of human culture book cover *Human Evolutionary Psychology* Louise Barrett, Robin Ian MacDonald Dunbar, John Lycett, 2002 Why do people resort to plastic surgery to look young Why are stepchildren at greatest risk of fatal abuse Why do we prefer gossip to algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology Human Behavioral Ecology Jeremy Koster, Brooke Scelza, Mary K. Shenk, 2024-03-14 Human behavioral ecology HBE applies the principles of evolutionary theory and optimisation to the study of human behavioural and cultural diversity Among other things HBE attempts to explain variation in behaviour as adaptive solutions to the competing life history demands of growth development reproduction parental care and mate acquisition This book is a comprehensive introduction to the theoretical orientation and specific findings of HBE It consolidates the insights of evolution and human behaviour into a single volume that reflects the current state and future of the field It brings together leading scholars from across the evolutionary social sciences to provide a comprehensive and thought provoking review of the state of the topic Throughout the authors explain the latest developments in theory and highlight critical debates in the literature while also engaging readers with ethnographic insights and field based studies that remain at the core of human behavioral ecology **The Social Science Encyclopedia** Adam Kuper, 1996 This reference has been written by an international team of contributors presenting a global understanding of the key issues within social sciences A board of

advisory editors has worked closely with the editors in determining the most important concepts thinkers and techniques in each field

*Adaptation and Human Behavior* Lee Cronk, Napoleon A. Chagnon, William Irons, This volume presents state of the art empirical studies working in a paradigm that has become known as human behavioral ecology The emergence of this approach in anthropology was marked by publication by Aldine in 1979 of an earlier collection of studies edited by Chagnon and Irons entitled *Evolutionary Biology and Human Social Behavior An Anthropological Perspective* During the two decades that have passed since then this innovative approach has matured and expanded into new areas that are explored here The book opens with an introductory chapter by Chagnon and Irons tracing the origins of human behavioral ecology and its subsequent development Subsequent chapters written by both younger scholars and established researchers cover a wide range of societies and topics organized into six sections The first section includes two chapters that provide historical background on the development of human behavioral ecology and compare it to two complementary approaches in the study of evolution and human behavior evolutionary psychology and dual inheritance theory The second section includes five studies of mating efforts in a variety of societies from South America and Africa The third section covers parenting with five studies on societies from Africa Asia and North America The fourth section breaks somewhat with the tradition in human behavioral ecology by focusing on one particularly problematic issue the demographic transition using data from Europe North America and Asia The fifth section includes studies of cooperation and helping behaviors using data from societies in Micronesia and South America The sixth and final section consists of a single chapter that places the volume in a broader critical and comparative context The contributions to this volume demonstrate with a high degree of theoretical and methodological sophistication the maturity and freshness of this new paradigm in the study of human behavior The volume will be of interest to anthropologists and other professions working on the study of cross cultural human behavior Lee Cronk is associate professor of anthropology at Rutgers University Napoleon Chagnon is professor of anthropology emeritus at the University of California Santa Barbara William Irons is professor of anthropology at Northwestern University Evanston Illinois

*The Evolutionary Origin of Human Behavior* Keith C. M. Glegg, 2009-03 Up until now there has been no explanation of how the outer layers of human behavior helped drive the evolution of ancient reptiles into modern day humans How did behavioral phenomena such as play learning by copying language REM sleep and storytelling influence the development of humanity as a whole The development of play was particularly important in the evolutionary process as it provided the bridge between the instinctive brains of reptiles to the powerful brains of birds and mammals Play however is just one factor that can help explain evolution and the development of human behavior In this book you will consider a gamut of issues including Evolutionary stages The paradox of animals that feed on animals The importance and repercussions of copy learning Primitive games The emergence of sleep The scientific community needs to think in new ways to accurately look at human evolutionary history Take that leap and consider new explanations of old behavior as you read *The Evolutionary*
