

Chapter 5 – Elasticity and Its Applications

Do they depend both on the numbers of these quantities?

- What is elasticity? What kinds of factors can increase, decrease, or change it?
- What is the price elasticity of demand? How is it related to the demand curve? How is it related to demand's steepness?
- What is the price elasticity of supply? How is it related to the supply curve?
- What are the income and cross-price elasticities of demand?

Key concepts:

Two things influence the level of demand:

the change in price of a good, and changes in its substitutes and complements.

How does the law of diminishing the opportunity cost of your time, as you're thinking of going your first job to college?

How does the law of diminishing returns that you want to sell an extra unit of a good if you have your good, how does that influence? How does it influence the level of output of that industry?

Key ideas:

- Some price elasticity measures how much the variable responds to changes in another variable.
 - One type of elasticity measures how much demand for one variable will fall if another variable rises.
- Elasticity:
 - Measuring it is somewhat measure of the responsiveness of Q^D to P or Q^S to one of its determinants.

Price Elasticity of Demand

- Price elasticity of demand measures how much Q^D responds to a change in P .
- It measures the price sensitivity of buyers' demand.

$$\text{Price elasticity of demand} = \frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$$

Along a demand curve, P and Q move in opposite directions, which usually makes price elasticity negative. We will drop the minus sign and report absolute values for positive numbers.

Example:

The price elasticity of demand for apples is 0.50. If the price of apples falls 10 percent, the quantity demanded will rise _____ percent.

Calculating Percentage Changes

• Price falls from 100 to 90, meaning a 10 percent fall.

• Quantity rises.

• If the price of apples falls 10 percent, the quantity demanded will rise _____ percent.
