developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism s traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter *The Encyclopedia Americana* ,1988 Evolution and Genetics Thomas Hunt Morgan,1925 **Los Angeles Magazine** ,2007-07 Bioethics, Justice, and Health Care Wanda Teays,Laura Martha Purdy,2001 This new text offers the perspectives necessary for a comprehensive and objective critique of the health care establishment By including diverse perspectives students obtain a more accurate sense of the issues and the ethical considerations in a pluralistic society that values justice in its health systems **Programs and Courses** University of Northern Iowa,2006 PGR ,2007
