The Oneness and Simplicity of God Barry D. Smith, 2013-11-13 That YHWH is numerically one is foundational to the theology of the Hebrew Bible Christian theologians historically have affirmed that there is a more fundamental type of oneness attributable to God God is one not merely in the sense of being the only God but also in the sense of being simple or non composite having no parts of any kind In this way God is said to be an absolute unity After a consideration of all the evidence Barry D Smith reaches the conclusion that there is no basis for ascribing simplicity to God The simplicity doctrine is not found in Scripture and the traditional arguments used to establish it are unconvincing In addition the recent defenses of the simplicity doctrine prompted by Alvin Plantinga s work *Does God Have a Nature* are unsuccessful It should not be thought however that the rejection of divine simplicity means that by default God must be conceived as composite not even as a perfect composite with maximally great God making properties Rather there is a third option God should not be conceived as either simple or composite The question of in which mode God has attributes or exemplifies properties should be set aside The Self-Disclosure of God William C. Chittick, 2015-03-26 The Self Disclosure of God offers the most detailed presentation to date in any Western language of the basic teachings of Islam s greatest mystical philosopher and theologian It represents a major step forward in making available to the Western reading public the enormous riches of Islamic teachings in the fields of cosmology mystical philosophy theology and spirituality The Self Disclosure of God continues the author s investigations of the world view of Ibn al Arab the greatest theoretician of Sufism and the seal of the Muhammadan saints The book is divided into three parts dealing with the relation between God and the cosmos the structure of the cosmos and the nature of the human soul A long introduction orients the reader and discusses a few of the difficulties faced by Ibn al Arab s interpreters Like Chittick s earlier work *The Sufi Path of Knowledge* this book is based primarily on Ibn al Arab s monumental work *al Fut t al Makk yah* The Meccan Openings More than one hundred complete chapters and subsections are translated not to mention shorter passages that help put the longer discussions in context There are detailed indices of sources Koranic verses and hadiths The book s index of technical terminology will be an indispensable reference for all those wishing to delve more deeply into the use of language in Islamic thought in general and Sufism in particular *Isaiah 1-39:*
