Going Concern:

International Financial Reporting Standards Greg F. Burton, Eva K. Jermakowicz, 2015-02-20 *International Financial Reporting Standards A Framework based Perspective* links broad concepts and general accounting principles to the specific requirements of IFRS to help students develop and understand the judgments required in using a principle based standard. Although it is still unclear whether the US will adopt IFRS, the global business environment makes it necessary for accounting students and professionals to be bilingual in both US GAAP and IFRS. This comprehensive textbook offers a clear presentation of the concepts underlying IFRS, a conceptual framework to guide students in interpreting and applying IFRS rules, a comparison between IFRS and US GAAP to develop students' understanding of the requirements of each standard, real world examples and case studies to link accounting theory to practice while also exposing students to different interpretations and applications of IFRS. End of chapter material covering other aspects of financial reporting including international auditing standards, international ethics standards, and corporate governance and enforcement, as well as emerging topics such as integrated accounting, sustainability, and social responsibility accounting, and new forms of financial reporting. Burton and Jermakowicz have crafted a thorough and extensive tool to give students a competitive edge in understanding and applying IFRS. A companion website provides additional support for both students and instructors.

Accounting Irregularities in Financial Statements Benny K. B. Kwok, 2005. Accounting irregularities are at the heart of those kinds of frauds that hit financial statements and include misstatement, misclassification, as well as misrepresentation. This book provides an in-depth practical reference for those professionals who need to understand, prevent, and combat accounting irregularities in financial statements.

The International law of expropriation as reflected in the work of the Iran-U.S. claims tribunals Allahyar Mouri, 1994-01-06. This book deals with expropriation and other measures affecting property rights as set out in the awards of the Iran U S Claims Tribunal and thus examines the relation between general international law and the *lex specialis* viz the provisions of the Algiers Declarations and the Treaty of Amity between the Governments of Iran and the United States. It studies what rights have been considered as property rights capable of being independently expropriated or affected by other measures and what rights have not been so qualified although they might have been considered as forming an element of valuation. Furthermore, the liability and attributability issues are discussed, as are the methods of compensation and of valuation.
